

1.2 ENVIRONMENTAL POLICY

Our Company is dedicated to minimizing the impact of our operations on the environment and to protect human health and conserve resources.

We have a commitment to demonstrate due diligence in the ongoing management of our projects and their effects on the environment.

In order to ensure that these commitments are met we will:

- Identify, review and manage the significant environmental aspects and impacts of our business and will integrate these activities with our quality assurance and health and safety programs.
- Use products and processes that will eliminate and or minimize harm to the environment,
- We shall continually assess the impact of our activities on the workplace environmental
- Waste shall be disposed of in a safe and environmentally responsible manner.
- Gain knowledge on environmental matters from federal state or local government sources and ensure that this knowledge is passed onto our Officers, Workers, PCBUs, and other interested parties regarding potential and actual hazards of our business activities.
- Act in a manner that will minimize environmental emergencies and incidents, whilst at the same time having in place a plan of action to respond quickly and effectively.
- Regularly review our activities and practices to continually improve our environmental performance.

Everyone has a general responsibility to care for the environment and to be aware of the environmental issues related to their work. This is a legal responsibility.

This policy shall be reviewed throughout the year and annually by senior management to reinforce our commitment to a clean and safe environment.
